Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. As per claims 1, 11 and 14, Applicant recites "a first resonance frequency" and "a second resonance frequency". Although the specification describes a first resonance frequency and a second resonance frequency (page 3) as being a start-up frequency and a run frequency, respectively, it is silent about what exactly those frequencies are in values or how to obtain them. As per claims 4, 13 and 15, Applicant recites "said first resonance frequency is about 1800 root mean square and said second resonance frequency is about 835 root mean square". Although the drawings show those numbers as claimed, the specification is silent about them and both fails to state whether they represent frequencies or voltages and how they are obtained. Such issues thereby raise doubt as to enablement. Claims 2-10, 12 and 16 are rejected by virtue of their dependencies on the independent claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kawabata et al., Patent No. 5,384,516 ; Wilhelm et al., Patent No. 6,211,623 ; Fischer, Patent No. 5,828,187; Ribarich, Patent No. 6,525,492; Giannopoulos et al., Patent No. 6,008,590.
